Advanced Driver Assistance Systems (ADAS) Technician Course

Overview

The ADAS Technician course is aimed at individuals currently working in the automotive industry, who have a workplace requirement to not only understand ADAS components and operational characteristics, but diagnose and successfully calibrate the various Systems commonly featured in today's modern light vehicles.

Technicians and Auto Electricians, etc, who have a good level of ADAS diagnostic skills and experience, will learn about ADAS components and operational characteristics, as well as gain an understanding of the types of ADAS repair and calibration equipment; ADAS diagnosis, live data, measurement, fault finding techniques; the risks associated with incorrect repair methods... and much more.

Information

Time: 8:30am to 4:00pm | 2 day duration

(morning tea provided, kitchen and café facilities available)

Location: MTA Queensland, Building 8, 2728 Logan Road, Eight Mile Plains, Qld

Cost: MTAQ Member: \$1,320 (inc. GST) | Non-Member: \$1,760 (Inc. GST)
