Advanced Driver Assistance Systems (ADAS) Vehicle Glass Course

Overview

The ADAS Vehicle Glass course is aimed at individuals currently working in the automotive glazing industry, who have a workplace requirement to understand, diagnose and successfully calibrate the ADAS front camera, commonly featured in today's modern light vehicles.

Auto Glazing and Windscreen Technicians will learn about ADAS components and operational characteristics, as well as gain an understanding of the calibration requirements and processes; dynamic and static calibration of front camera (windscreen); completing and storing documentation relating to ADAS calibration... and much more.

Information

Time: 8:30am to 4:00pm | 1 day duration
(morning tea provided, kitchen and café facilities available)
